Gift from the Heart and CHX Technologies announce a supply agreement for Prevora to help the Bay of Quinte's adults with poor oral health.

Gift from the Heart (GFTH) a non-profit charity serving the oral health needs of underserved adults in the Bay of Quinte, Ontario, announced today a supply agreement with CHX Technologies for the Prevora antiseptic treatment.

“Prevora is a very useful treatment for serving our clients because it is quickly applied, involves no equipment and no pain, and can be used by our hygienists in the community as well as in our clinics to get at the root cause of poor oral health in our region” said Bev Woods, BSc, RRDH, executive director of GFTH.

GFTH has 2 clinics in the Bay of Quinte region of Ontario, which provide preventive dental care as well as dental surgical services to the many adults with limited access to oral healthcare.

“CHX is really pleased to help GFTH on its unique mission in the Bay of Quinte” said Ross Perry, President of CHX. “We have been working with Bev for some time on how Prevora can best be used in this underserved part of the community.”
